

APPRAISAL SHAREWARE LLC AGREEMENT FOR SOFTWARE EVALUATION, ACTIVATION, USE, AND MAINTENANCE

PLEASE READ THIS AGREEMENT CAREFULLY. THIS AGREEMENT CONSTITUTES A LEGALLY BINDING AND COMPLETE AGREEMENT BETWEEN YOU, THE "LICENSEE", AND APPRAISAL SHAREWARE LLC, THE "DEVELOPER" OF PROTECTED INTELLECTUAL PROPERTY IN THE FORM OF THE COMPUTER SOFTWARE, WEBSITE, DOCUMENTATION, AND RELATED MATERIALS DESCRIBED BELOW. THIS PROPERTY IS OWNED BY THE DEVELOPER AND LICENSED FOR USE ONLY ACCORDING TO THE TERMS OF THIS AGREEMENT.

BY DOWNLOADING, INSTALLING, USING, OR ACCESSING THE SOFTWARE, YOU INDICATE ACCEPTANCE OF THIS AGREEMENT AND AGREE TO BECOME BOUND BY ITS TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ANY PART OF THE TERMS OF THIS AGREEMENT: 1) DO NOT DOWNLOAD, INSTALL, ACCESS, OR USE THE SOFTWARE, AND 2) DESTROY OR RETURN ANY COPIES OF THE SOFTWARE AND RELATED MATERIALS WHICH MAY BE IN YOUR POSSESSION.

This agreement: 1) constitutes the entire statement of agreement between the parties; 2) supersedes any other understandings, representations, agreements and arrangements, either expressed or implied; 3) is intended for electronic acceptance rather than hardcopy execution by the parties; 4) is presented to Licensee for review and electronic acceptance upon installation and activation of the Evaluation Software; and 5) is accepted by Licensee affirmatively clicking "Agree" during installation or activation of the Software.

1. **PURPOSE:** The purpose of this Agreement is to recite the terms and conditions under which the Developer licenses, supports, and warrants the Software for use by the Licensee.
2. **PARTIES:** The parties to this agreement are AppraisalShareware LLC, a Colorado Limited Liability Company (herein 'Developer'), developer of the Software (defined below) and individuals and entities intending to evaluate or use the Software (herein 'Licensee').
3. **EFFECTIVE DATE:** The effective date of this agreement shall coincide with the time of creation of Licensee's Evaluation License, as determined by the date and time when the Licensee first downloaded the Evaluation Software from the AppraisalShareware.com website or when the Licensee accepted a CD containing the Evaluation Software.
4. **SOFTWARE definition:** As used herein, the "Software" is defined as the computer instructions, data, data and information presentation formats, and related intellectual property entitled DataShareAPS, a Microsoft Windows application which facilitates the collection, translation, verification, research, enhancement, organization, storage, analysis, exchange, and presentation of commercial real estate information.
 - a. **Software form and installation:** The Software is distributed as a standard Windows installation package, intended for installation on a single IBM-PC compatible personal computer. Specific hardware and operating system requirements are delineated by the hardware and software requirements page of the AppraisalShareware.com website. The installation software is available for free download from the AppraisalShareware.com website or from a physical CD at a nominal cost.
 - b. **Software component modules:** Because the Software is comprehensive, some components are subdivided into separately-licensable and interoperable modules in order to simplify operation, training, support, and marketing. Software licenses may be purchased for individual software components (Core+ licensing) or as integrated systems (Integrated licensing) which encompass multiple components. While component licensing enables Licensees to more precisely configure initial software installations to meet individual needs, the Developer cannot guarantee that the historical demarcation between software components will be observed in future updates, and Core+ Licensees may be required to license additional components in order to utilize some future updates. Integrated licensing is recommended for Licensees intending to participate with Software Maintenance Subscriptions.
 - c. **Software and License versions:** Whether installed from CD or downloaded from the website, the installation software is Evaluation Software which is time-limited, functionality-restricted, and intended for testing installation compatibility and feature demonstration rather than productive commercial use. After installation and registration of the Evaluation Software, the Licensee can upgrade to Activated Software by purchasing and installing an activation key from the AppraisalShareware.com website. When registered, the activation process will automatically download additional software to upgrade the Evaluation Software, to Activated Software with full functionality for all software modules purchased. The upgrade from Evaluation to Activated Software also includes a 6-month Software Maintenance Subscription, with which the Licensee can install updates of any licensed software modules or report library additions published subsequent to the Evaluation Software originally installed. The licensee is encouraged but not obligated to renew subsequent Software Maintenance subscriptions on an annual basis. The corresponding software license definitions granted

under this progression of available software versions, upgrades, and subscription options are detailed in the following sections and summarized in the attached table.

- d. **Evaluation software:** The Evaluation Software can be downloaded and installed for free, and will operate for a limited time, during and after which the Licensee will have the choice of uninstalling or activating the software. As the Evaluation Software is intended for testing installation compatibility and feature demonstration rather than productive commercial use, it is functionally restricted in many ways, including the capability to render output for inclusion in appraisal reports. Website registration of Evaluation Software is encouraged and enables the Licensee to access training videos and other help resources. However, Evaluation Licensees are restricted from posting messages in the Community Forum or downloading software updates or additional reports from the website.
 - i. **Evaluation License:** By downloading the Evaluation Software or accepting it on CD, the Licensee is granted and accepts an Evaluation License and in this document is referred to as an “Evaluation Licensee”. The Evaluation License grants limited-time and restricted-functionality usage rights to the software for evaluation purposes and is provided by the developer “As Is” without any liability or warranty of any kind. As consideration for the opportunity to evaluate the software, the Evaluation Licensee agrees to be bound by the terms and conditions of this agreement, irrespective of his decision to activate the software.
 - e. **Activated software:** At the option of the Licensee, installed Evaluation Software may be upgraded to Activated software anytime during the evaluation period by purchasing an activation key from the AppraisalShareware.com website, installing the Activation key into the Evaluation Software, and registering the Activated Software with the AppraisalShareware.com website. An internet connection is required. When registered, the activation process will automatically download and install additional software to upgrade the Evaluation Software to Activated Software with full functionality for all software modules purchased.
 - i. **Activated License:** By activating the Evaluation Software, the Licensee is granted and accepts an Activated License and in this document is referred to as an “Activated Licensee”. The Activated License grants fully-functional usage rights for each software component license purchased, software product warranty, enhanced website privileges, and access to software and report library updates with a 6-month software maintenance subscription at no additional cost. Enhanced website privileges include: read/write access to the support forums where most support issues can be resolved, and advanced and technical videos can be accessed. The 6-month Software Maintenance Subscription upgrades the Activated Licensee status to Supported Licensee status, which allows download and installation of updates for licensed software modules and report library additions. The licensee is encouraged but not obligated to renew subsequent Software Maintenance subscriptions on an annual basis thereafter.
 - f. **Software Maintenance Subscription:** The Software Maintenance Subscription is an ongoing service for deployment of software corrections, updates, and enhancements. At no additional charge, newly Activated Licensees are granted an initial 6-month Software Maintenance Subscription as an opportunity to insure that their software installation is up-to-date and any outstanding support questions are favorably resolved. After the initial 6-month subscription, participation in the service is optional but strongly encouraged. The Software Maintenance Subscription section of this agreement outlines the details of the service.
 - i. **Supported License:** A Software Maintenance Subscription upgrades an Activated License to Supported License status and the affected Licensee is referred to as a “Supported Licensee” in this document. Evaluation Software and Licensees are not eligible for participation in the service. The Supported Licensee is allowed to download and install updates for licensed software modules and report library additions on a continuing basis without charge (Level 1 support) and is eligible for additional fee-based software customization services (Level 2 support). While the initial 6-month Software Maintenance Subscription is provided automatically and free of charge to newly Activated Licensees, the annual renewal subscriptions which are offered thereafter are not free. The Supported Licensee is encouraged but not obligated to renew the Software Maintenance Subscription. As detailed in the Software Maintenance Subscription section of this agreement, if the subscription is not renewed in a timely manner, the Supported Licensee is downgraded to Activated Licensee status, and the Activated Software is frozen at the then current update level without any guarantee of compatibility with future updates.
5. **AGREEMENT TERM:** The term of this agreement includes the terms of the Evaluation, Activation, and Support Licenses as described below, or as stipulated in the termination section of this agreement. Irrespective of license termination, all Confidentiality and Non-Disclosure provisions of this agreement are intended to remain in force permanently.
- a. The Evaluation License term is temporary, typically 30 days or less, with termination intended to coincide with either: 1) expiration or un-installation of the Evaluation Software; or 2) activation of the Evaluation Software.
 - b. The Activated License term is intended to be of longer duration, say several years, with termination intended to coincide with Licensee’s cessation of use and un-installation of Activated Software and return or destruction of related materials.

- c. The Supported License term is intended to be of periodic duration, with an initial term of 6 months, plus successive renewal terms at the option of the Licensee by his election to pay annual subscription renewal invoices when due.
6. **SOFTWARE MAINTENANCE SUBSCRIPTION:** The Software Maintenance Subscription Program is an ongoing system for deployment of future software corrections, updates, and enhancements to participating licensees of the Software.
- a. **Licensee and software eligibility:** The Software Maintenance Program only covers software for which an activation license has been purchased. Evaluation and Beta-test software are not covered by the Software Maintenance Program.
- b. **Included Level 1 support services:** The Developer's Software Maintenance Program provides newly-Activated and Supported Licensees online access to Level 1 support services free of charge for the duration of Licensee's subscription. Level 1 support services include: software bug corrections, software product updates and enhancements, and documentation and training updates via the AppraisalShareware.com website. The Licensee is responsible for downloading and installing this content following the instructions published on the website.
- c. **Optional Level 2 support services:** Participation in the Software Maintenance Program makes the Licensee eligible for Level 2 support services (individualized support and consulting), but Level 2 support services are provided subject to availability and written agreement between the parties specifying the cost and scope of services, deliverables, and timetable. Level 2 support services include individualized technical training, consulting, and engineering services above and beyond the standardized automated support provided under Level 1 support. Examples of Level 2 support services include: individual telephone support and consulting; software adaptation and customization; design and development of custom reports; design and development of custom charts and data visualizations; data conversion and integration services; and custom programming. The cost of Level 2 support services is typically \$100/hour, or as superseded by written agreement of the parties for any specific project.
- d. **Periodic subscription fee and subscription term:** Licensee is automatically enrolled in the software maintenance program at no additional cost for an initial term of 6-months upon Licensee's purchase of an activation license for the Software. After the 6 month initial term, Licensee's participation in the software maintenance program is optional and may be renewed annually by Licensee's timely payment of the periodic subscription fee when invoiced by the Developer. The annual subscription fee is subject to change, and is currently \$100 per year, payable in advance prior to the beginning of each renewal term.
- e. **Renewal invoice:** Approximately 30 days prior to each renewal anniversary, the Developer will send an email invoice to the Licensee for the next year's subscription fee. Instructions for online payment are included in the email.
- f. **Termination:** Licensee's participation in the Software Maintenance Program is optional and may be terminated at any time upon written notice to the Developer by the Licensee, or by non-payment of the renewal fee at any renewal anniversary. Licensee's participation in the Software Maintenance Program may also be terminated by the Developer at any time based upon Licensee's breach of the terms and conditions of this agreement.
- g. **Grace period:** If the Licensee should happen to inadvertently lapse his membership in the program by failure to pay a renewal subscription fee prior to a renewal anniversary, the Developer will email the Licensee reminding him of the renewal anniversary. The Licensee may reinstate his subscription without penalty by paying the renewal fee within 30 days of the lapsed subscription renewal. Reinstatement after a 30-day lapse is at the option of the Developer.
- h. **Offer and Acceptance:** The Software Maintenance Subscription is intended as an optional electronic contract within the scope of this agreement. The Developer's periodic renewal offer shall be evidenced by an email invoice for the renewal subscription term, and Licensee's periodic renewal acceptance shall be evidenced by the Licensee's electronic payment of the invoice.
7. **PROPRIETARY INTERESTS and AUTHORIZATIONS:** The Licensee acknowledges that the Developer owns all right, title and interest in and to the Software and related tangible or intangible Developer Property. The authorizations granted herein do not diminish, in any manner, Developer's rights, title and interests in the Developer Property. No other licenses, grants or authorizations under any patent, trademark, copyright, trade secret or other intellectual property, either common law or statutory, is either granted or implied by the provision, distribution and/or disclosure of said Developer Property to the Licensee. The Licensee's access and/or use of Developer Property is limited to the scope of the authorizations described herein. All other rights of any kind which are not expressly granted in this license are entirely and exclusively reserved to the Developer.
- a. **Developer Property:** Documents or other embodiments of information or data, and expressions; Developer confidential information as described herein, including any related, associated or underlying concepts, ideas, methods, and processes; algorithms, source, object, binary, executable code, html and code listings; interfaces, improvements, enhancements, modifications, changes, alterations, versions, releases, updates, error corrections and bug fixes; system(s) and architecture; expressions and derivative works thereof; having patent, copyright, trade secret, trademark, service mark, trade name and any other proprietary interest, whether statutory or

common law, which is in existence as of the Effective Date or which is developed, generated, or created by Developer during the term of this agreement. Absent written agreement to the contrary, the Licensee further acknowledges that any non-prohibited improvements, enhancements, changes, alterations, modifications or derivative works offered for sale or license to others, which are developed, created or generated by the Licensee, either jointly with Developer or solely during the term of this agreement, shall be owned and held by Developer and that the Licensee hereby assigns all right, title and interest therein, without further consideration, to Developer to confirm Developer's ownership thereof. (Collectively, "Developer Property").

- b. **Licensee usage rights:** During the term of this agreement, Developer grants to the Licensee the following limited, revocable, non-exclusive, and non-transferrable usage rights to certain items of Developer Property: 1) the Licensee is authorized, on a non-exclusive basis, to install the Software on a single computer; 2) the Licensee is authorized, on a non-exclusive basis, to execute and use the Software in his own business practice, but shall not permit access to the Software for use by third parties or other business entities; and 3) the Licensee is authorized to use the Software to access and reproduce materials which are non-copyrighted, materials owned by the Licensee, or materials Licensee is authorized or legally permitted to reproduce. If Licensee is uncertain about the right to copy any material, contact a legal advisor.

8. **PROHIBITED USES:** The Licensee agrees not to allow use of the software for the prohibited usage delineated below. Licensee is advised that the Software incorporates license protection features designed to help enforce these terms and conditions. This protection includes collection of hardware and software information to uniquely identify the computer where the software is installed. This information is collected and monitored for license compliance purposes in accordance with Developer's privacy policy, and is designed to impose minimum overhead for users of the application software and website.

- a. The Licensee shall not: disassemble, decompile, reverse engineer, translate, extract, modify, alter, or create derivative works of the Developer Property, including but not limited to the Format, the Software itself, or contents of any Developer websites; attempt to gain unauthorized access to restricted portions or features of the Software or associated websites; hack, password mine, probe, scan, sniff, or vulnerability test the Software or associated websites; monitor, analyze, or interfere with network communications between the Software and associated websites; attempt to breach or exploit security or authentication measures employed by the Software or associated websites; utilize reverse look-up, network tracing, or site exploitation to identify private information of other Licensees or website users; use any device, software, or agent which could potentially interfere with the proper working of the website or Software; make access to the software available to others in connection with a service bureau, cloud services, application service provider, or similar business or technology.
- b. The Licensee is not permitted to alter, modify, change or, in any manner, affect the integrity or quality of the Developer Property, including but not limited to the Format and the Software, or remove any confidential and/or proprietary notice that appears on the Developer Property, including but not limited to the Format and the Software, nor remove, alter or modify any of Developer's proprietary notices such as, but not limited to, Developer's copyright notice on the Software, Format, or on any Developer Property.
- c. The Licensee shall not disclose, disseminate, distribute, license, assign or transfer the Software, the Format, or allow access to any Developer Website, or Developer Property, to any third party.
- d. Licensee shall not impose an unreasonable or disproportionately large load on the infrastructure of the website, related systems, or networks.
- e. Licensee shall not use the application software or associated websites for any purpose that is unlawful or prohibited by this agreement, the website Terms of Use, or to solicit the performance of any illegal activity or other activity which infringes the rights of the Developer or other website and software users.
- f. The licensee will not allow simultaneous multi-user access to a single installed copy of the Software. The Licensee is advised that the Software is not designed for this purpose and is specifically prohibited under the terms of this license agreement. If the Licensee requires multiple copies of the software, or multi-user accessibility, additional copies of the software can be provided at a discounted price, but under no circumstances should multiuser operation be attempted on single-user software installation.

9. **CONFIDENTIALITY:** The Licensee shall consider the Software (including any accessible source code and associated code listings) and Developer Property, including all related technical and business information, whether disclosed in oral, visual or written form, to be confidential and proprietary to Developer. The Licensee shall exercise at least a reasonable standard of care to protect the confidentiality of the information, and to prevent the unauthorized use, dissemination, disclosure or publication of confidential information during the term of this agreement. The Licensee may disclose such confidential and proprietary information to those of its employees, sub-contractors or consultants, who have a definable need to know and who are under similar obligations of confidentiality and use as provided herein. The term of confidentiality shall extend indefinitely beyond the expiration and/or termination of this Agreement.; however, it is understood that this Agreement shall impose no obligations of confidentiality on the Licensee where the Program or Developer Property is disclosed under operation of law, provided that Licensee timely notifies Developer and Developer is given the opportunity to protest such disclosure, is disclosed with Developer's prior written approval.

- a. The Licensee acknowledges that Developer deems the terms and conditions recited in this Agreement, but not the parties to or the existence of this Agreement, to be confidential.
- b. Except for archival purposes of disaster backup protection, no portion of the Software may be reproduced,

republished, uploaded, posted, publicly displayed, encoded, translated, transmitted or distributed in any way (including "mirroring") to any other computer, server, website or other medium for publication or distribution or for any commercial enterprise, without the prior written consent of the Developer.

10.

WARRANTIES/DISCLAIMERS/INDEMNITY/LIMITATION OF LIABILITY

- a. **Warranty:** The Software is licensed on an "as is" basis without any warranty except as provided herein. There is no warranty of fitness for any purpose or not meeting the individual expectations of the Licensee.
 - i. **Software bugs and corrections:** Developer acknowledges and Licensee understands that bugs may occur in the Software. The historical status of known software bugs, fixes, and workarounds are openly tracked in the website forums and are available for Licensee reference and access in accordance with Licensee's maintenance status. The Developer will respond to reported and reproducible software bug reports in accordance with the software maintenance provisions of the Licensee's software maintenance status as outlined below. The Developer's warranty to respond to software bugs is license-dependent as follows:
 - a. Evaluation License: No warranty;
 - b. Activated License: Bug fixes or workarounds will be made available for download from the website only for the most current version of the software;
 - c. Supported License: The Developer warrants that the software will perform as represented on the website, video demonstrations, and marketing materials. Bug fixes or workarounds will be made available for download from the website on either as updated software, or patches or workarounds to the most current version of the software.
 - ii. **Bug reporting and repair:** The Developer will make reasonable effort in evaluating reported problems and correcting reproducible bugs at its own expense. The Developer is not obligated to cure unreported problems. The Licensee is responsible for reporting suspected bugs using the bug reporting protocol built into the application software, and monitoring website forums for the most up-to-date information on bug responses, fixes, and workarounds.
 - iii. **Issue tracking:** The Developer will respond in a timely manner to reported and reproducible problems or errors in the Software, and provide a searchable issue tracking resource in the website forums at AppraisalShareware.com to assist the Licensee in evaluating software anomalies, tracking the repair status of confirmed bugs, and advising of available patches, updates, or workarounds.
 - iv. **Features may change:** Developer acknowledges and Licensee agrees that portions of the Software are designed specifically to interface with free or low-cost internet search and mapping services from Microsoft, Google, and other providers. Developer acknowledges and Licensee understands that these providers may change their mapping or search technologies or public access policies in such a manner that the functionality of the existing Software could be impaired. If this occurs, the Developer will attempt to restore similar functionality on a "best efforts" basis in accordance with any software maintenance subscription in effect at the time, but future availability of existing functionality in its present form cannot be guaranteed by the developer.
 - v. **Forward/backward feature compatibility:** The Developer warrants forward compatibility between new software features or bug corrections with historical user data only with continuous support subscription participation. Backward compatibility of future bug corrections or upgraded features with historical user data is not guaranteed without continuous support subscription participation.
- b. **Indemnification:** The Licensee shall indemnify and hold Developer harmless from and against all claims, costs, liabilities, damages, and judgments (including reasonable attorney's fees and court costs) that Developer may suffer or incur arising out of third party claims due to the: (i) Licensee's use of the Software in connection with real estate appraisal or other business activity; (ii) Licensee's non-compliance with the conditions under Section *; (iii) Licensee's unauthorized use, copying, modification, alteration of or unauthorized combination of materials, items, software or components with the Program or Format or Developer Property; (iv) Licensee's infringement, misuse or unauthorized use of Developer Property; (v) Licensee's business arrangements with any third party in connection with this Agreement or the Program, Format or Report; (vi) Licensee Data, which Licensee edits, inputs and modifies; or (vii) Licensee Data manipulation or processing that generates inaccurate, erroneous, corrupted or missing Licensee Data, whether or not included in a Report.
- c. **Limitation of Developer liability:** The Licensee assumes all liability for his use of the Software and indemnifies the Developer from any consequential liability to third parties. In no case shall the liability of the Developer exceed the price actually paid by the Licensee.
- d. **Indemnification of Developer against unauthorized use:** The Licensee warrants that his use of the Software will be for legal and authorized purposes only. Just because internet content is electronically-accessible does not imply that it can be legally downloaded, stored, and reproduced for Licensee's use. The Licensee specifically indemnifies the Developer against any liability arising from Licensee's use of the Software to download, use, store, publish, or share internet data in any manner for which the Licensee is unauthorized.
- e. **Licensee responsibility for appraisal content:** The Licensee is advised that utilization of data, statistics, reports, and analyses produced with the Software warrants careful professional review, verification, and scrutiny.

Because the software facilitates collection, analysis, and reporting from an exceptionally large volume of data, invalid data can be inadvertently included and mathematical and statistical errors can occur as a result of improper use of the software. For this reason, the Licensee assumes sole responsible for the content of property appraisals and analyses prepared with the Software, and all data reports, graphs, and statistics produced using the software should be carefully reviewed.

- f. **Licensee responsibility for data input:** The Licensee assumes full responsibility and liability for the accuracy and reliability of any data input to the Software, either directly by the Licensee or through a third-party data provider, and Format presentation of such data as Licensee may provide to others in conjunction with Licensee's business use of the Software.
- g. **Liability for loss or damage of data:** Developer shall not be responsible for or liable for any loss, corruption or erasure of Licensee data or third-party data accessed, used, or maintained by the Software, or data or information that is obtained from any other sources through the Software. The Licensee acknowledges that Developer is not responsible for any errors or omissions in such data or information.
- h. **Disclaimers:** Except for the warranties expressly stated herein, the Software is provided "as is," with no other warranties, express or implied, including but not limited to, implied warranties of merchantability, fitness for a particular purpose, accuracy, usability or reliability of any report generated for any purposes, or non-infringement. The licensee assumes all liabilities, responsibilities and obligations with respect to any reliance on the Software, Format, and reports produced therefrom. Licensee acknowledges that the reports, Format, and output produced by the Software are intended as single analytical reference tools to be considered in conjunction with the Licensee's larger and more comprehensive professional analysis of real estate issues, and are not to be relied upon solely as a predictor with respect to any business decision or activity. Any licensee data input is the sole responsibility of the licensee, and the licensee assumes the entire liability for the accuracy and reliability of any licensee data or report generated therefrom, and developer makes no warranties or representations with respect to the foregoing. Developer does not warrant that website access and/or use of the program will be uninterrupted or remain available forever. Developer makes no warranties as to any government provided data or information. Further, developer shall have no obligation or liability in connection with the storage or retrieval of any licensee data or the integrity of the data so stored or retrieved. Additionally, developer employees, consultants, representatives or contributors shall not be authorized to give advice, interpretation, explanation or analysis of any report generated nor may the licensee rely or use such advice if so given for any purpose.
- i. **Liability limitation:** The Developer's entire liability to Licensee for any claim for any kind of loss or damage arising in connection with this agreement shall be limited to actual and provable damages up to the amounts of money paid hereunder, including pro-ration of the unused portion of the current renewal Software Maintenance Subscription term, if applicable. In no event shall Developer's entire liability exceed this amount. No other damages are available.
- j. **Nature of damages:** Except where otherwise recited, in no event shall either party be liable to the other for any consequential, special, punitive or incidental damages, including but not limited to, damages associated with or arising from loss of profit or revenues. Some states do not allow such limitation, and in that event this section shall be modified to comport with that particular state's regulatory statute. The above remedies are the entire remedies available for the breach of any warranty provided herein or this agreement.

11. **TERMINATION.**

- a. **License revocation and monetary damages:** The Developer may revoke Licensee's website access privileges and software usage license if it is determined that the Licensee has circumvented the Developer's license protection and illegally installed multiple copies of the software without compensation to the developer. In such event, irrespective of the discounted price actually paid by the Licensee as consideration for this License, monetary damages shall be calculated based upon the retail price of the software products pirated, multiplied by the number of illegal installations made. The Developer shall also have the right to collect court costs, attorney fees, and collection expenses associated with any related legal or collection action.
- b. The Licensee may, at any time and without cause, terminate this Agreement with thirty (30) days written notice.
- c. If the Licensee breaches the Agreement by failing to pay in-full to Developer any moneys due and owing hereunder; or if either party materially defaults in the performance of its obligations hereunder, or otherwise breaches this Agreement, the breaching party shall correct such breach within thirty (30) days after written notice from the non-breaching party. If any such breach is not remedied within such thirty (30)-day period, then the non-breaching party, at its option, may terminate this Agreement by giving final written notice to the other party.
- d. Upon any termination of this Agreement, the following shall occur: i) all rights granted to the Licensee hereunder, shall immediately terminate; ii) the Licensee shall immediately, at the option of Developer, delete, with written confirmation, or return, any Developer Property in the Licensee's possession or control to Developer; and (iii) the Licensee's Access will immediately cease. The Licensee acknowledges that any monies paid hereunder are **not** refundable for any type of termination hereunder, except as recited in Section 7.

12. **OTHER**

- a. All amendments or modifications of this Agreement shall be binding upon the parties so long as the same

shall be in writing and executed by each of the parties hereto.

- b. The provisions of this Agreement are severable; and if any provision shall be deemed invalid or unenforceable, the applicability or validity of any other provision of this Agreement shall not be affected, and this Agreement shall be construed as if such invalid or unenforceable provisions are not contained in this Agreement
- c. The Licensee shall comply with U.S. Export Control laws and regulations, and Internet laws and regulations.
- d. The Licensee shall not, without the prior written consent of Developer, assign or delegate this Agreement, or any rights or duties hereunder, directly, indirectly, by operation of law, or otherwise to any third party. In the event of any permitted assignment hereunder, the assignee shall accept, without modification, in its entirety all the terms and obligations recited herein.
- e. In the event of a dispute, prior to any formal action being taken, the parties shall try and resolve this dispute at the executive level within thirty (30) days following receipt of written notice that a dispute exists. If such dispute is not resolved within such thirty (30) days, then the parties may resort to formal action in the form of Arbitration as provided below in Section 12(j).
- f. This Agreement shall be governed by the laws of the State of Colorado applicable to contracts entered into and to be performed entirely within the State of Colorado, without regard to the principles of conflicts of law, and if a claim or controversy arises, such claim or controversy shall be submitted to binding arbitration in Boulder, Colorado in accordance with the subsequent understanding. Developer shall be entitled to seek all available legal and equitable remedies available. With regard to any claims hereunder for damages, the prevailing party shall also be entitled to reasonable attorney's fees and arbitration costs. All limitations of liability as recited herein shall apply to any award. Notwithstanding the provisions of this section 12(j) regarding arbitration, Developer or the Licensee may proceed to any court of competent jurisdiction to obtain immediate injunctive relief with regard to protecting any intellectual property or confidential and proprietary information.
- g. For all claims submitted to binding arbitration, the parties agree to have the claim(s) submitted before three arbitrators and conducted pursuant to the Rules of Commercial Arbitration of the American Arbitration Association ("AAA"). Each party shall pick one arbitrator from the panel list supplied by the AAA, and the third arbitrator shall be chosen by the two appointed by the parties. The parties agree that the award of the Arbitrators shall be the sole and exclusive remedy between them regarding any claims, counterclaims, issues or accountings presented or pled to the Arbitrators. The decision of the Arbitrators shall be final, binding and incontestable and may be used as a basis for judgment, thereon in Colorado, or elsewhere as the situation dictates. Pending the submission to arbitration and thereafter, until the Arbitrators publish their decision, the parties shall, except in the event of termination, continue to perform all their obligations under this Agreement without prejudice to a final adjustment in accordance with the arbitrator's award.
- h. All requirements for notices hereunder must be in writing; and forwarded to the above address either via a reputable national overnight courier or registered certified mail, return receipt requested. The parties further acknowledge that facsimile signatures or signatures in PDF format are fully binding and constitute a legal method of executing modifications of this Agreement.
- i. This Agreement may be executed in one or more counterparts, each of which shall be deemed to be a duplicate original, but all of which, taken together, shall be deemed to constitute a single instrument.

Summary of DataShareAPS Software and License Versions

Software Version, User License, Licensee Status	License Commencement	License Term	Termination	Warranty	Support
Evaluation Software Evaluation License Evaluation Licensee	An evaluation license is granted when evaluation software is accepted on CD or is downloaded from the website.	The evaluation license term is intended to be temporary, typically 30 days or less.	The evaluation license becomes an Activated License upon software activation, or terminates at the end of the evaluation period, or when the evaluation software is uninstalled. Confidentiality and non-disclosure provisions remain in force perpetually.	Evaluation software is time-limited, functionally-restricted, and provided "As Is" for evaluation purposes only without any warranty of any kind.	Web-based support for evaluation software includes email bug reporting, read-access privileges in the website support forums, and access to basic training videos from the website video library on a bandwidth-available basis.
Activation Software Activated License Activated Licensee	An activated license is granted when evaluation software is activated through the purchase, download, installation, and registration of an activation key from the website.	The term of an activated license is indeterminate. survives until terminated.	An activated license can be terminated with written notice by either party, when the activated software is uninstalled and all related materials returned or destroyed, or by breach of license by the licensee. Confidentiality and non-disclosure provisions remain in force perpetually.	Activation Software is fully-functional for each module purchased and is warranted to perform according to program specifications.	Web-based support for activated software includes 6 months of software and report library updates at no additional cost (see below), read/write access privileges in the support forums, forum-based bug reporting, and access to all videos from the website video library.
Supported Software Support License Supported Licensee	An initial 6-month support license is granted at no additional charge upon registration of activated software.	Renewable annually at the option of the Licensee.	If not renewed prior to expiration of any subscription term, a Support License will automatically be downgraded to Activated License status, with reinstatement and grace period as delineated by the Software Maintenance section of this agreement.	Future Software updates and enhancements for licensed products will be made available for download at no additional cost.	Web-based software and report library updates; unlimited level 1 support at no additional cost; eligibility for Level 2 support. Prioritized bug fixes and access to customization services.
